Kristian D. Torres Bautista

Geophysicist (BSc, MSc)
✉ torresba@ualberta.ca • kristian-torres

Geophysicist with a background in seismic imaging and signal processing. Passionate for programming and technology. Enthusiast of analytical and problem-solving challenges.

Education

Ph.D. in Geophysics — Edmonton, Canada
University of Alberta. Supervisor: Dr. Mauricio Sacchi. — 2019–2023
Deep learning solutions for seismic inverse problems. — GPA: 4/4

MSc. in Computational Geophysics — Rio de Janeiro, Brazil
Federal University of Rio de Janeiro. Supervisor: Dr. Webe Mansur. — 2017–2019
Least-squares migration and full-waveform inversion in time domain via adjoint-state methods. — GPA: 3/3

Exchange Student in Geophysics — São Paulo, Brazil
University of São Paulo – Institute of Astronomy, Geophysics and Atmospheric Sciences — 2014

BSc. Geophysical Engineering — Caracas, Venezuela
Simon Bolivar University — 2010–2015
Honors senior thesis: Feasibility study of water and steam injection monitoring via time-lapse seismic refraction in heavy oil reservoirs. — GPA: 4.15/5

Experience

Research assistant for the Signal Analysis and Imaging Group (SAIG) — 2019 - present
Design of supervised and unsupervised deep learning methods to enhance seismic inversion, imaging, and processing algorithms, resulting in one paper accepted for publication in *Geophysics*, one submitted for review, and expanded abstracts published in conferences.
Research interests: Neural networks, FWI and LSM imaging, HPC, and seismic processing.

Research assistant in Laboratory of Modeling Methods and Computational Geophysics — 2017 - 2019
My research focused on developing more efficient parametrization and regularization techniques for full-waveform inversion and HPC strategies for reducing the computational burden of wave-equation based forward and inverse problems; resulting in the publication of two peer-reviewed papers.

Teaching assistant for the course "Mathematical Methods in Civil Engineering" COPPE/UFRJ
I broadened and shared my knowledge by teaching the theory and practice of linear algebra, Laplace and Fourier transforms, initial and boundary value problems and other core topics in engineering to more than 40 graduate students. First term, 2018

Land Seismic QC Geophysicist Intern – PDVSA Sísmica Bielovenezolana Monagas, Venezuela
- Supervised field operations (drilling, topography, recording) Summer 2013
- Designed 2D and 3D seismic acquisition survey
- Preprocessing of the seismic signal (QC)
- Visualization of seismic data and 3D surveys with Arcgis software

Languages, Programming Languages and Computer Skills

English: Full professional proficiency
TOEFL iBT score: 108/120

Portuguese: Full professional proficiency
CELPE-Bras certified (B2 level)

Spanish: Native language

Programming: Fortran, C, Python, Matlab, Julia, Tensorflow, Pytorch, Git, Docker, OpenACC, OpenMP, MPI, Dask.

Seismic softwares: Seismic Unix, Petrel, OpendTect, HampsonRussel, GLOBEClaritas, Madagascar.

OS: Linux, Windows, MacOS.

Professional Awards and Honors

David Bartel Scholarship granted by the Society of Exploration Geophysicist (SEG) 2018

FAPERJ "Nota 10" Scholarship for outstanding academic achievement 2018
Special scholarship awarded to the best graduate students in the state of Rio de Janeiro

SEG/Chevron Student Leadership Symposium (SLS) Travel Grant Award 2017
Travel Grant to attend SLS 2017 program and SEG's 87th Annual Meeting

SEG/Exxon Mobil Student Education Program (SEP) Travel Grant Award 2016
Travel Grant to attend SEP 2016 program and SEG's 86th Annual Meeting

1st Place–Imperial Barrel Award 2015
Latin American and Caribbean Region. Through this prospective basin evaluation competition I had the opportunity to work with 3D Danish North Sea seismic and well-log data, conducting seismic sequence stratigraphy and horizon interpretation, seismic-well tie, time-to-depth conversion, petrophysical analysis and basin modeling using Petrel software.

2nd Place–Society of Petroleum Engineers (SPE) Student Paper Competition 2015

Honorific Mention for outstanding undergraduate senior thesis 2015

Certificates

First EAGE/SBGF Workshop on Least-Squares Migration. 2018

Advanced GPU Computing for Geophysics. 15th International Congress SBGf 2017

SEG DISC - Geophysical Electromagnetics: Fundamentals and Applications. 2017

Introduction to VSP interpretation. Simon Bolivar University 2016

Special Topics in AVO Attributes and Analysis. Simon Bolivar University 2016

Extracurricular Activities

Executive member of the University of Alberta Geophysical Graduate Society 2019–present
